

This document is a list of most of the new additions to Project Professional 2007 (from 2003) with a brief explanation of each. Many “minor” areas have been modified or upgraded between versions with patches or Service Packs, (ie. Auto-Accept Rules, Project Guide) but those are not included in this list. These are presented in no particular order.

Project Professional 2007

- Visual Reports – Visio and Excel reports from Professional
- Custom Fields – an unlimited number, and multiple values allowed
- High Level Budget – cost tracking
- Cost Resources – define planned and actual costs
- Task Status – details, comments, history, team member information
- Background cell highlighting – ability to highlight cells in views
- Multiple Currency – ability to use multiple currencies in one instance
- Non-Working Time (Administrative Time) – named vacations, using alternative work weeks
- Change Highlighting – shows all items changed by a single change
- Task Driver – shows drivers for a task
- Multiple Level Undo – ability to undo more than one change
